

We are a leading contract research services company in the area of early drug discovery and development. We started our operations in the year 2001 in India; currently we have our presence in United States, Europe, Japan and Australia. We have a strong talent pool of 800+ trained scientists, drawn from the best national and international institutes and industry. Our services span from specific solutions to integrated discovery projects across multiple therapeutic areas with focus on Central Nervous System (CNS), Inflammation & Pain, Metabolic Disorders and Infectious Diseases.

Our Offerings:

Comprises of end-to-end chemistry, preclinical discovery and platform technologies research solutions for discovery of new drug candidates including new chemical entities (NCE).

Chemistry

- Medicinal Chemistry Synthesis
- Parallel Medicinal
- Custom Synthesis
- Analytical
- Process Research & Development
- cGMP Kilo Scale Synthesis

Preclinical Discovery

- Medicinal Chemistry
- Computer Aided Drug Design
- Molecular Pharmacology
- Assay Development & Screening
- Drug Metabolism & Pharmacokinetics
- In Vitro ADME & Bio-Analysis
- Rodent Pharmacokinetics
- In Vivo Pharmacology
- Side Effect Profiling
- Safety & Toxicology
- Compound Management

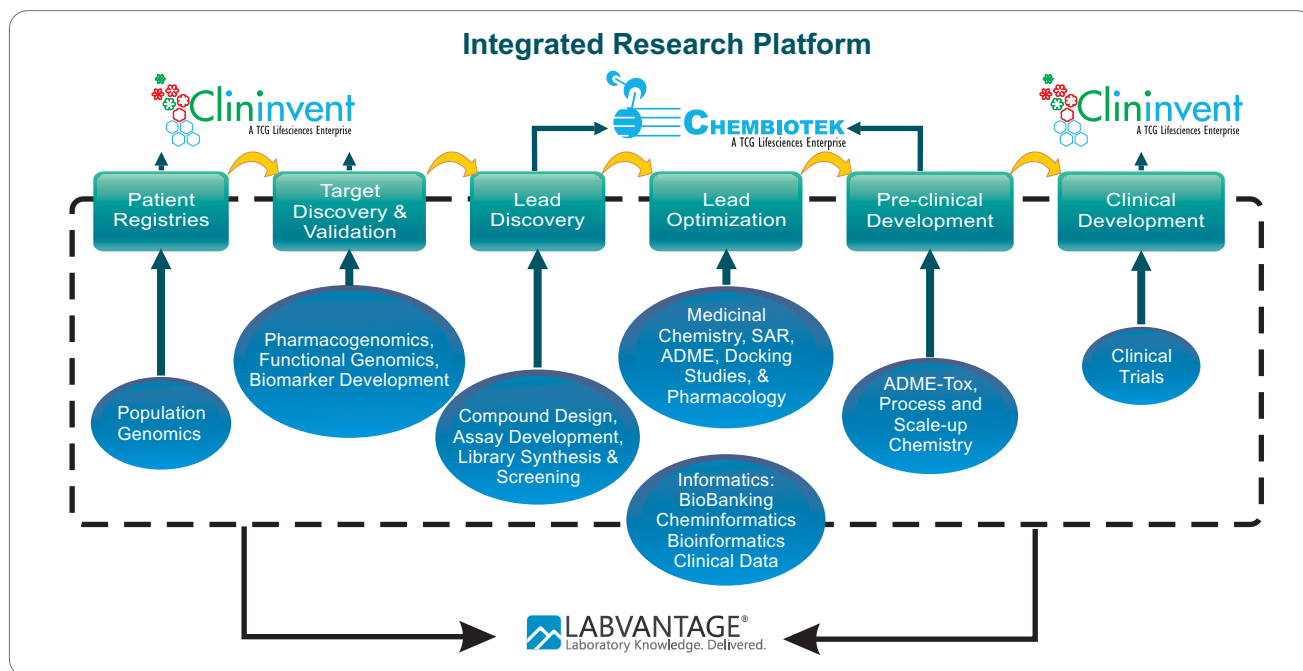

Platform Technologies

- Electrophysiology
- siRNA
- Peptides & Bio-conjugates

Salient features:

- 800+ scientists (incl. 150+ PhDs) with high retention ratio.
- State-of-the-art research facilities >250,000 sq. ft. (Chemistry, in vitro Pharmacology, DMPK, Animal house, electrophysiology, BSL 2 & 3, cGMP kilo lab).
- First Indian CRO to set up "Pre-clinical discovery biology capabilities".
- Only Indian CRO addressing preclinical, clinical and IT (LIMS) needs of pharma & biotech industry.
- Over 200 customers across the pharmaceutical value chain.
- Highly efficient and robust 'innovation engine' that reduces time cycle and cost, enabling 'faster-better-cheaper' delivery of 'drug candidates'.
- Versatile e-LNB platform developed by us, has been licensed by several customers.
- Strong domain expertise in pain and inflammation, and evolving domain expertise in CNS, metabolic and infectious diseases.
- High ethical standards and protects client IP with strict vigilance.

Clinical Research Solutions (Clininvent):

Comprises of clinical development services.

Clinical Development Solutions

- Clinical Trial Management
- Data Management
- Medical Writing
- Pharmacovigilance
- Quality Assurance & GCP Training

Enterprise Informatics (LABVANTAGE):

Comprises of innovative enterprise solutions tailored for laboratories across multiple industries.

Enterprise Informatics Solutions

- Analytical Services
- Quality Management
- BioBanking
- Research and Development

SAPPHIRE, our "flagship product" is a zero-footprint laboratory information management suite (LIMS), it is tailored to manage an organization's critical laboratory information across its worldwide R&D pipeline and manufacturing supply chain to optimize productivity and more effectively share knowledge.
